Meeting Agenda
1300 EST – 12 March 2015**

I. Enterprise Discussion

A. Schedule of Events (SOE) Enterprise highlights, available [online](#)

- ❖ NESDIS is moving satellite image hosting from sateps to GEOdist. NCO/PMB switched to pull satellite data from GEOdist on March 11. GOES-E satwnd data is not correct on the DDS so WCOSS ingest is still pulling from sateps. Satepsdist 24/7 support will continue until March 25.
- ❖ WCOSS – LSF to reject jobs submitted without a valid project code. Work to be done on Tide on March 18 and Gyre on March 19.
- ❖ WCOSS 2-factor authentication and ssh keys dates:
3/9 - 3/13 -- development users with production access will have their ssh keys locked down
3/16 - 3/20 -- all group accounts will have their ssh keys locked down, as well as remaining users in NCO/PMB
3/24 – lock down access nodes. All users will have to log in through the Bastion hosts using 2-factor authentication

B. Upcoming Model Changes and additions – details are available [online](#).

- ❖ The 30-day evaluation for upcoming RTMA/URMA upgrade began March 2, with expected end date of March 31. Implementation is planned for mid-late April.
